

Freedom Convoy/Ambassador Bridge Protest

(WPS: 22-11390, OPP: RM22009444)

Debrief Request Form

Name	Emily Bertram / Stephen Laforet
Responsibility/Team Assignment	WFRS

Summary of Involvement (point form acceptable)
Emergency Operations Centre – Making EOC available and functional for the duration of the response. Liaison between municipal Community Control Group and WPS IC.

What did the WPS do well?	Recommendations for Improvement
EOC: - Technology supported the event - Facility performed mostly as expected - Good communication between IC and Emergency Planning Officer - WPS had implemented an appropriate IAP - CEMC directed efforts to ensure all city actions anticipated or otherwise, fit within the IAP and communication took place prior to any city action	EOC: - Not enough parking - Lack of kitchen/food prep area in the EOC room - Lack of trained personnel to perform the duties of the Emergency Planning Officer WPS: - At times, established path of communication to City staff such as public works, engineering, fire, etc. broke down, however, was remedied quickly - CCG and city administration unsure how to integrate their role with respect to WPS IAP - Request for provincial request for assistance (RFA) process needs to be better understood by all – this can be addressed during annual EOC training

Additional Comments
Communication between police agencies and EMS and WFRS was good. They updated us of all road closures and communicated well with EMS.
